

HRMS SaaS Platform - Final Workflow & User Management Architecture

Platform Structure

The platform consists of two completely separate levels:

Level 1: Platform Administration

Managed only by the SaaS provider.

Role: Super Admin

Responsibilities:

- Manage subscription plans
- Manage organizations
- View platform analytics
- Monitor revenue
- Suspend or activate organizations
- Manage platform settings
- Access support tools

The Super Admin is NOT part of any customer organization.

Level 2: Customer Organization

Every customer company creates its own organization.

Organization Structure

Organization

Core Principle

Every person inside a company is an Employee first.

Roles are assigned afterwards.

This means:

- Admins are employees
- HRs are employees
- Managers are employees
- Owners can also be employees if required

All employees receive:

- Employee ID
- Attendance
- Leave Balance
- Payroll
- Payslips
- Documents
- Employee Profile

Roles only provide additional permissions.

Complete Customer Onboarding Workflow

Step 1: Plan Owner Registration

The customer representative creates an account.

Fields:

- Company Name
- Full Name

- Work Email
- Phone Number
- Password

System Creates:

- Organization
- Plan Owner Account

Role Assigned:

Plan Owner

The Plan Owner is responsible for subscription and billing management.

Step 2: Plan Purchase

The Plan Owner selects a plan.

Examples:

Starter

- Up to 25 Employees
- Attendance
- Leave Management

Growth

- Up to 250 Employees
- Payroll
- Advanced Reports

Enterprise

- Unlimited Employees
- Custom Roles
- API Access
- SSO

After payment:

- Subscription Activated

- Organization Activated
-

Step 3: Organization Setup

Plan Owner configures:

Company Details

- Company Name
- Logo
- Address
- Timezone

Attendance Settings

- Working Hours
- Shift Rules
- Weekend Rules

Leave Policies

- Casual Leave
- Sick Leave
- Earned Leave

Payroll Settings

- Salary Components
- Deductions
- Tax Settings

Departments

Examples:

- Engineering
- HR
- Finance
- Sales
- Marketing
- Operations

Designations

Examples:

- Admin
 - HR Executive
 - Team Lead
 - Software Engineer
 - Sales Executive
-

Step 4: Employee Creation

Before assigning roles, all users must be created as employees.

Example:

Employees

- Amit Sharma
- Priya Verma
- Rohit Singh
- Neha Jain
- Rahul Patel

Each employee receives:

- Employee ID
 - Employee Profile
 - Department
 - Designation
 - Attendance Account
 - Leave Account
 - Payroll Profile
-

Step 5: Role Assignment

After employee creation, roles are assigned.

Example:

Amit Sharma
Role: Admin

Priya Verma
Role: HR

Rohit Singh
Role: Manager

Neha Jain
Role: Employee

Rahul Patel
Role: Employee

Roles only determine permissions.

Employee records remain the same.

Step 6: User Activation

After role assignment:

- Invitation Email Sent
- User Sets Password
- Account Activated

The employee can now log in.

Employee Portal

Every user receives access to the Employee Portal.

Available for:

- Admin
- HR
- Manager
- Employee

Common Features:

- Dashboard
- Attendance
- Leave Management
- Payslips
- Documents
- Profile
- Notifications

Everyone uses the Employee Portal.

Additional modules appear based on assigned role.

Role Responsibilities

Plan Owner

Primary Purpose:

Subscription and Organization Owner

Responsibilities:

- Purchase Plans
- Renew Subscription
- Upgrade Plans
- View Billing
- View Invoices
- Configure Organization Settings
- Assign Roles
- Add or Remove Admins

Normally does not handle daily HR operations.

Admin

Administrative Operations

Responsibilities:

- Employee Management
- Department Management
- User Management
- Attendance Monitoring
- Leave Monitoring
- Reports
- Organization Announcements

Additional Access:

- Employee Management Module
 - Reports Module
 - Organization Settings Module
-

HR

Human Resource Operations

Responsibilities:

- Employee Onboarding
- Employee Offboarding
- Attendance Management
- Leave Management
- Payroll Processing
- Payslip Generation
- Employee Documents

Additional Access:

- HR Dashboard
 - Payroll Module
 - Employee Records Module
-

Manager

Team Management

Responsibilities:

- Manage Team Members
- Approve Leave Requests
- Approve Attendance Corrections
- Review Team Reports

Additional Access:

- Team Dashboard
- Team Attendance
- Team Leave Requests

Managers can only access employees reporting to them.

Employee

Standard Employee

Responsibilities:

- Mark Attendance
- Apply Leave
- View Payslips
- Download Documents
- Update Profile

No management permissions.

Reporting Hierarchy

Every employee can report to a manager.

Example:

Engineering Manager

Sales Manager

Database Field:

reports_to = manager_id

This powers:

- Leave Approval
 - Team Reports
 - Team Dashboards
-

Attendance Workflow

Employee

- Clock In
- Clock Out

Manager

- Reviews Team Attendance

HR/Admin

- Reviews Organization Attendance
-

Leave Workflow

Employee

- Apply Leave

Manager

- Review Leave

HR

→ Final Approval

System

→ Update Leave Balance

Status:

- Pending
 - Approved
 - Rejected
 - Cancelled
-

Payroll Workflow

HR

→ Generate Payroll

Admin (Optional)

→ Review Payroll

System

→ Generate Payslips

Employees

→ Download Payslips

Employee Onboarding Workflow

Plan Owner

↓

Create Employee Records

↓

Assign Roles

Invite Users

Users Activate Accounts

Admin / HR / Managers Take Over Operations

Long-Term Operational Flow

Plan Owner

- Manages subscription
- Handles billing
- Reviews reports

Admin

- Runs organization operations

HR

- Manages workforce

Manager

- Manages teams

Employees

- Use employee self-service features
-

Final Architecture

Super Admin (Platform)

└─ Organization

└─ Plan Owner

Key Rule:

Every Admin, HR, and Manager must first exist as an Employee record and use the Employee Portal. Roles are assigned afterward to unlock additional management permissions.
